Dear Sir/Mam,

I hope this letter finds you well. I am writing to express my strong interest in this internship, which recognizes newcomers in the software industry and supports them in developing their skills. I am currently in my fourth year at the National Institute of Technology, Surathkal, pursuing a degree in Electrical and Electronic Engineering.

As an engineer, I have had the opportunity to meet people with diverse skills. My coding journey began in my first year, where I started with Python, developing basic projects using Pygame. I later transitioned to DSA in **C++**, deepening my understanding of coding fundamentals. Through solving numerous problems, I continually learned and evolved my skills.

I then ventured into Web Development, starting with *HTML* and *CSS* to create web pages. My interest led me to **JavaScript**, which opened up many possibilities. I learned React and developed a project with it, during which I needed a server. This prompted me to learn **Node.js**, **Express.js**, and **PostgreSQL** for backend development. I continued my learning with **React Native**, **Firebase**, **Google Cloud Platform**, **Android Studio**, and **Postman API**, ultimately developing full-stack web applications and mobile apps.

Although I consider myself an intermediate coder, I am an enthusiastic learner with a genuine passion for exploring new technologies. While I may not be the most experienced candidate, I am confident that my adaptability, eagerness to learn, and diverse skill set make me a strong fit for this role. I greatly admire your company's commitment to encouraging and respecting diversity.

Thank you for considering my application. It would be a wonderful opportunity to contribute and grow with your team if I am selected.

Yours sincerely,

Himanshu
